Cardioplegia Cannulae, Antegrade Aortic Root, with and without Vent Line, 3.1 mm, R502-15

The Aortic root cannulae are intended to cannulate the aortic root for cardioplegic solution delivery into the coronary arteries, and for venting of the heart during cardiopulmonary bypass surgery for periods up to six hours. The Aortic root cannulae with pressure line are intended to cannulate the aortic root for cardioplegic solution delivery into the coronary arteries, and for venting of the heart during cardiopulmonary bypass surgery for periods up to six hours. The pressure line allows pressure measurements in the aortic root Depending on country registration, an optional phospholipid surface treatment may be available to help improve biocompatibility. Note on ordering: coated products have a "B" before their reference code. Please, contact your local sales representative

Order Code R502-15

Size 3.1 mm

Insertion Needle 17 Ga

Available Coated Depending on country registration

Effective Length (cm) 13

Qty Per Box 10

Latex-Free yes

No DOP yes
